

## Organic Purees

As well as hot nursery meals, Zebedees also offer a range of food specifically for babies.

We have developed and produced our own **100% organic frozen baby food purees**.  
This range is totally additive and preservative free.

Our nutritious baby purees are **steam cooked** to preserve all nutrients and then frozen to preserve all natural flavours and colours.

We have a range of purees from **stage 1 upwards**.  
Our product range will vary depending on season and availability of ingredients.

Each box of purees come in a variety of three different flavours making a total of **20 conveniently sized cubes**, each weighing approximately 36 grams.
